Mr. Kevin Jones
RICHLOOM FABRICS GROUP
100 Bailey Plant Road
Clinton, NC 29325

Reference: Laboratory Test Report
Lab Identification No. 69225
Invoice No. 100515

Dear Mr. Jones:

One (1) fabric sample, identified as **Harnett Platinum**, was received and tested in accordance with the NFPA 260, "Cigarette Ignition Resistance of Components of Upholstered Furniture, 2024 Edition", (Cover Fabric Test). The results are as follows:

Test Results

Vertical Char Lengths

8mm

8mm

8mm

*Date Tested: August 18, 2026

*Conditioned minimum of 4 hours @ 70±5°F and <65% RH

The sample submitted **meets** the requirements of the above standard and may be considered a **Class I Cover Fabric**. There were no ignitions on any of the three specimens tested. In addition, none of the three test specimens displayed a vertical char which was equal to or greater than 45 mm.

Sincerely,

Brian S. Dement

BSD/mr

Lab Identification No. 69225

Sample Identification: **Harnett Platinum**

Test Procedure and Apparatus for Testing the Smolder Resistance of Materials Used in Upholstered Furniture

(Technical Bulletin 117-2013)

(A)

Section 1: Cover Fabric Test

Relights Test

Specimen No.	Duration of smoldering (min: sec)	Open flaming (Yes/No)	Vertical char length (mm)	Comments
1	Self-extinguished 7min:19sec	NO	8	Pass
2	Self-extinguished 5min:39sec	NO	7	Pass
3	Self-extinguished 3min:24sec	NO	8	Pass

Remark: Allow the cigarettes to burn their full lengths unless an obvious ignition of the polyurethane substrate occurs. If a cigarette extinguishes before burning its entire length, place a fresh cigarette on a new test assembly and cover with sheeting fabric until either (1) three cigarettes have burned their entire length on three individual test specimens, or (2) three cigarettes have self-extinguished on the specimen.

Pass/Fail Criteria

- A single mock-up test specimen fails to meet the requirements of this test procedure if any of the following criteria occurs:
 - The mock-up test specimen continues to smolder after the 45 minute test duration.
 - A vertical char length (measured as specified in step 11.9 of ASTM E1353-08a ± 1) of more than 1.8 inches (45 mm) develops on the cover fabrics.
 - The mock-up test specimen transitions to open flaming.
- The cover fabric passes the test if three initial mock-up specimens pass the test.
- If more than one initial specimen fails, the cover fabric fails the test.
- If any one of the three initial specimens fails, repeat the test on additional three specimens.
- If all three additional specimens pass the test, the cover fabric passes the test. If any one of the additional three specimens fails, the cover fabric fails the test.

Sub-Conclusion

The submitted sample **meets** the requirements of section 1 for cover fabric test of California Technical Bulletin 117-2013.
